PROFESSIONAL SUMMARY

Detail-oriented Quality Assurance Tester with 4 years and 6 months of experience in end-to-end testing, functional testing, User Acceptance Testing (UAT), regression testing, smoke testing, and defect management for high-traffic e-commerce and government systems. Experienced in CRM data validation, loyalty points, and SMS and Viber notification testing, validating business requirements, reporting defects in JIRA and Redmine, and collaborating with cross-functional teams in Agile and Waterfall environments. Currently building test automation skills with Playwright and preparing for the ISTQB Technical Test Analyst certification.

CORE SKILLS

Testing: Manual Testing, End-to-End, Functional, UAT, Regression, Smoke, Sanity, UI/UX, Web & Mobile Testing, CRM Data Validation, SMS/Viber/OTP Testing, Payment & Checkout Testing

QA Process: Test Scenario Creation, Test Case Design & Execution, Requirements Validation, Defect Management, Bug Reporting, Retesting, Documentation & Reporting

Tools: JIRA, Redmine, SAP Commerce (Hybris), SmartEdit CMS, Infobip, Google Sheets, Azure DevOps (basic), AI tools

Automation (learning): Playwright with TypeScript (basic), API testing (learning)

Methodologies: Agile, Waterfall

PROFESSIONAL EXPERIENCE

Quality Assurance Tester – Nityo Infotech

Aug 2023 – Apr 2026

- Executed end-to-end testing for web and mobile e-commerce platforms, including product browsing, cart, checkout, payment, and order management on SAP Hybris (SAP Commerce); used SmartEdit CMS to enable or disable items as conditions for test cases.
- Validated CRM account data in a microservices environment, including loyalty points, points earned through checkout, promotions, and membership tier eligibility.
- Tested event-triggered SMS and Viber messages sent through Infobip (checkout notifications, registration and forgot-password OTPs, membership vouchers), including SMS across Philippine carriers: Globe, Smart, and TNT.
- Led UAT projects for enhancements and new features; prepared and maintained UAT documentation for deployment and validation.
- Logged, tracked, and validated defects in JIRA; collaborated with developers, designers, business analysts, and stakeholders.

Software Tester – Prime@ Technology Specialists, Inc.

Apr 2021 – Dec 2022

- Executed test cases and maintained Google Sheets trackers; reviewed system requirements and validated application behavior.
- Logged and tracked defects in Redmine.
- Generated comprehensive test evidence across testing cycles.

KEY PROJECTS

Playwright Test Automation (self-taught, GitHub). Built UI tests for a practice login page (valid and invalid login, empty fields, logout) and API tests (GET, POST, PUT, PATCH, DELETE, response validation, 404 cases) using Playwright and TypeScript.

PPSR Quality Assurance & System Audit. Handled scope and regression testing; validated financial transactions and authentication modules.

Migration of Shopify to SAP Hybris. End-to-end testing of web and mobile checkout, payment, and order management on SAP Hybris.

Digital Asset Management. Tested image and video uploads, publishing workflows, synchronization with Hybris, template banners, and campaign behavior.

Promotion Landing Page Enhancement. UI/UX testing for banners, coupon zones, deals, videos, and routing validation.

EDUCATION

Bachelor of Science in Computer Engineering – Colegio de Montalban

2015 – 2020

TRAINING & CERTIFICATIONS

- ISTQB Technical Test Analyst Preparation – Board Infinity via Coursera (May 2026)
- Fundamentals of Risk-Based & White-Box Testing – Board Infinity via Coursera (2026)
- Static & Dynamic Analysis for Technical Testing – Board Infinity via Coursera (2026)
- The Artificial Intelligence for Communities Workshop – VJAL Institute (April 2026)
